Maintenance techniques and artwork

Objectives

- Awareness and awareness of the participants of the concepts of operational maintenance and increased production excellence.
- Explain and introduce participants to how to maintain outstanding operational and increase production.
- Training the participants on how to identify and define the outstanding operational maintenance and increase production.
- Provide participants with the necessary skills to deal with outstanding operational maintenance plans and increase production.
- Demonstrate and impress participants on how to pursue and implement outstanding operational maintenance and increase production.
- Training and discussion through workshops on modern planning of production - Practical and scientific methods of planning and implementation of production - How to follow up and implementation of production and maintenance plans - Discuss, follow up and measure production rates and maintenance performance

Who Should Attend?

- Health and Safety Managers
- Field supervisors
- Engineers and specialists in safety
- Webmasters and anyone who requires a better knowledge of the rules and regulations of safety requirements in the workplace.

Seminar Outline

DAY 1

- Its introduction is for outstanding operational maintenance and increased production
- How to develop plans for production and maintenance
- Evaluate the effectiveness of production and maintenance plans
- Practical cases

DAY 2

- Define the basics of operational maintenance
- Planning and implementation of operational maintenance
- Evaluating the effectiveness of operational maintenance
- Practical cases

DAY 3

- Application of quality specifications for production and maintenance
- Planning and implementation of operational maintenance and its importance in quality control
- Ways to improve production processes with attention to outstanding operational maintenance
- Practical cases

DAY 4

- Plans for operational maintenance
- Inventory and coating of equipment to facilitate operational maintenance
- Methods of implementing different maintenance
- Planning and implementing various training for production and maintenance personnel
- Practical cases

DAY 5

- Review, measure and analyze performance rates in operational and production
- Analysis of data on maintenance operations and production
- Ways of continuous improvement of productive maintenance
- Training in computer programs for management of operational maintenance
- Practical cases
